Revision History

Doc Version	Release	Summary	Description
1.0.0	2026/03/11	Initial Draft	Initial UI UX workflow for EBT POS transaction processing
1.0.1	2026/03/20	Updated copy	As per comments dated 20-Mar-2026

Document Overview

Purpose

This document describes the User Interface (UI) and User Experience (UX) workflow for Electronic Benefit Transfer (EBT) transactions on the POS terminal.

It outlines the step-by-step interaction between the POS device, the merchant, and the cardholder during different EBT transaction types.

The objective of this document is to:

Provide clear visibility of the transaction flow on the POS screen

- Define merchant and cardholder interaction points
- Ensure consistency with host processing requirements
- Enable customer review and sign-off.

Scope

This document covers the UI/UX flows for the following EBT transaction types supported on the POS terminal:

EBT SNAP Benefit Purchase

EBT Cash Benefit Purchase

EBT Cash Benefit Purchase with Cashback

EBT Void Last

EBT SNAP Benefit Return

EBT Voucher Settlement

EBT Balance Inquiry

EBT Cash Withdrawal

Each transaction section will include:

- Transaction description
- Preconditions
- Step-by-step POS screen flow
- Merchant interaction
- Cardholder interaction
- Host communication steps
- Error and edge case handling (where applicable)

Summary:

The EBT transaction processing workflow on the POS terminal is designed to provide a simple, guided interaction for both merchants and cardholders while ensuring compliance with EBT processing rules.

Each transaction follows a consistent user journey, which includes:

1. Transaction Selection

The merchant initiates the transaction by selecting the required EBT transaction type from the POS menu.

Example:

EBT Transactions

1. EBT SNAP Benefit Purchase
2. EBT Cash Benefit Purchase
3. EBT Cash Benefit Purchase with Cashback
4. EBT Void Last
5. EBT SNAP Benefit Return
6. EBT Voucher Settlement
7. EBT Balance Inquiry
8. EBT Cash Withdrawal

2. Amount Entry (if applicable)

For transactions requiring an amount:

The POS prompts the merchant to enter the transaction amount.

Example:

ENTER AMOUNT

\$25.00

For cashback transactions:

ENTER PURCHASE AMOUNT

ENTER CASHBACK AMOUNT

3. Card Presentation

The POS prompts the cardholder to present their EBT card.

Example:

Tap/Swipe/Insert

4. Benefit Selection (If required)

For certain EBT transactions, the cardholder may select:

- EBT SNAP Benefit Purchase
- EBT Cash Benefit Purchase

5. PIN Entry

The cardholder enters their EBT PIN on the PIN pad.

6. Host Authorization

The POS sends the authorization request to the EBT host system.

7. Host Response

The POS processes the host response.

Possible outcomes:

Approved

APPROVED

PRINTING RECEIPT

Declined

TRANSACTION DECLINE

Timeout / Communication Error

8. Receipt Printing

The POS prints:

Merchant receipt

Customer receipt

9. Transaction Completion

The POS returns to the main EBT transaction menu.

UI/UX Design Principles:

The POS UI is designed with the following principles:

Simplicity

- Minimal screens
- Clear prompts

Guided Merchant Flow

- Step-by-step prompts

Cardholder Clarity

- Easy-to-read PIN prompts
- Clear approval / decline messages

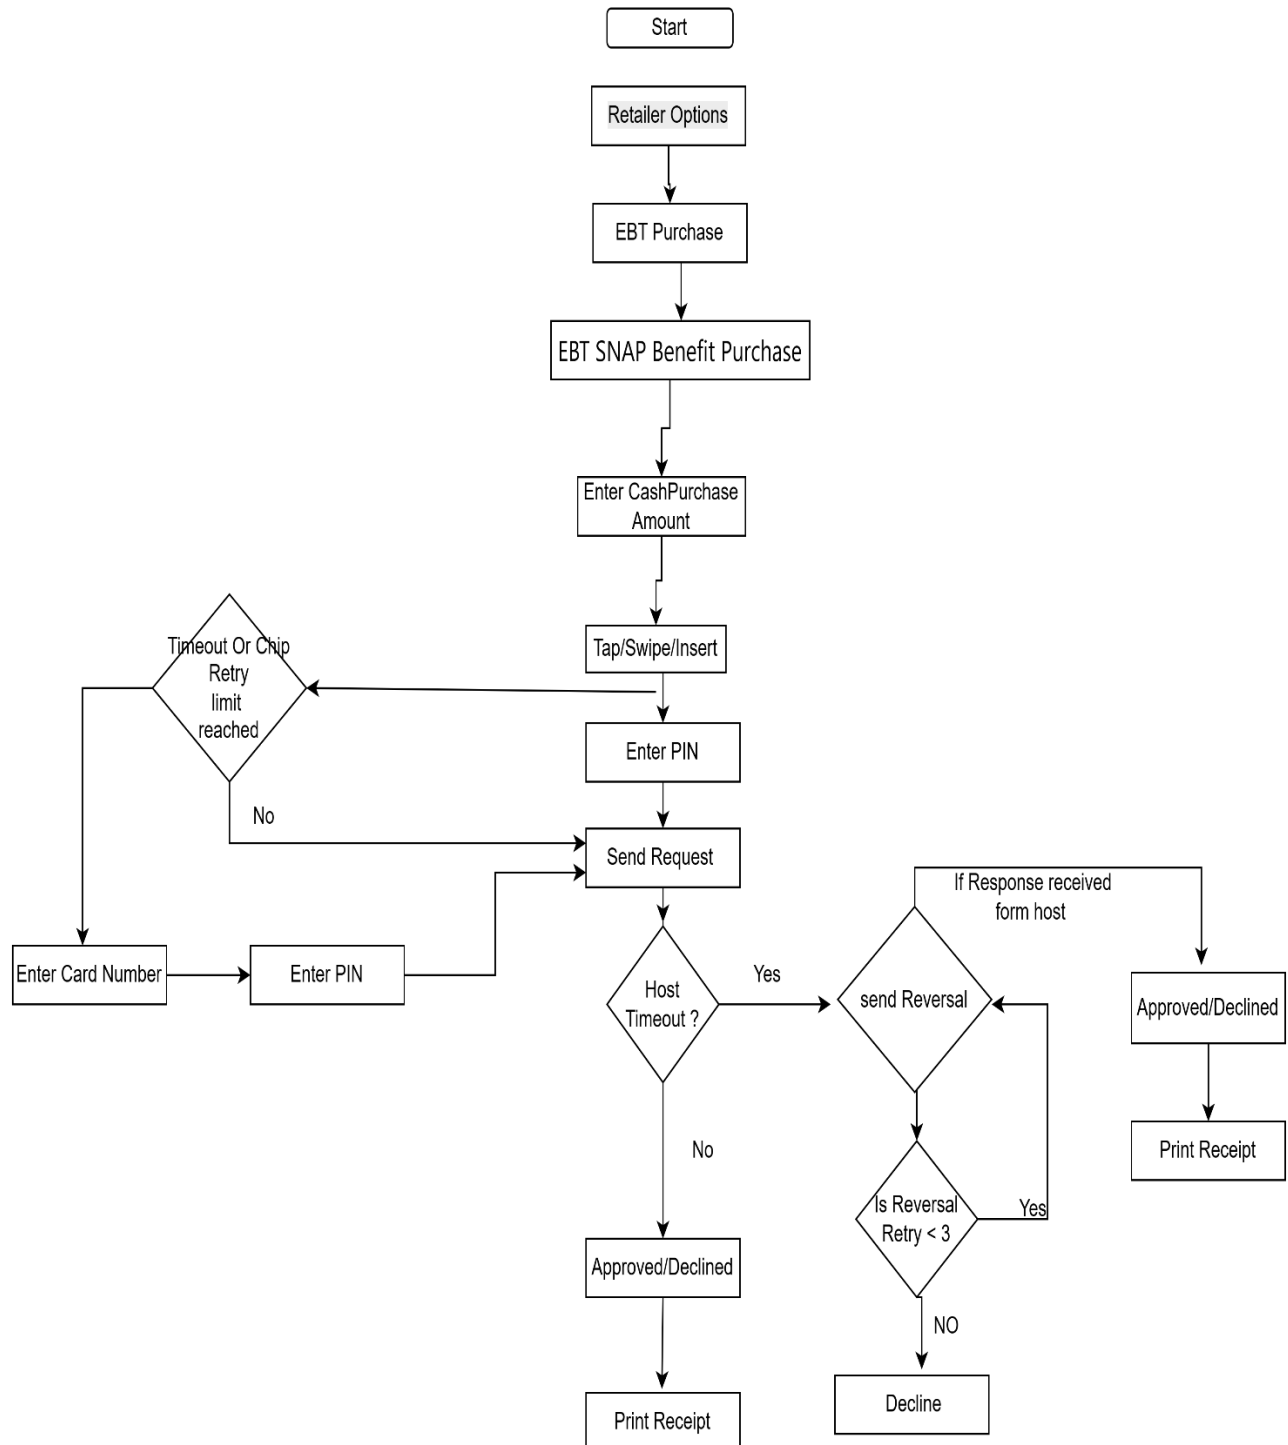

Error Prevention

- Validation of amount entries
- Retry mechanisms

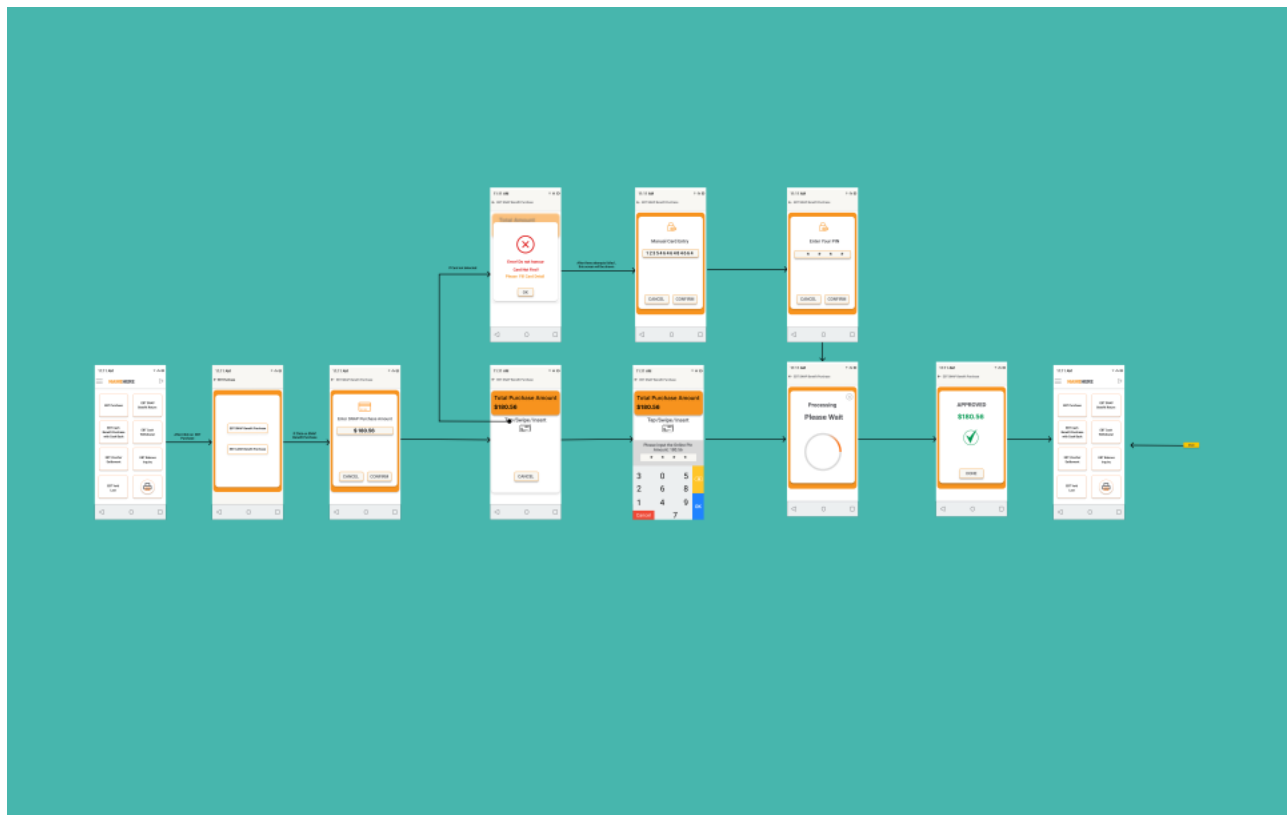

Compliance

- Secure PIN entry
- Host processing rules

9. EBT Activation Flow

UI_UX Flow:

Scope of Approvals

Your approval will confirm that:

1. The UI layout and screen flow meet the operational requirements.
2. The transaction sequence and user journey are acceptable.
3. The navigation flow and screen elements are finalized for development.
